

# How to Decrypt a password protected PDF for free

There are several reasons you might want to remove password protection from a pdf. Perhaps you would like to send it to someone else or the process of entering a password time and again is tedious. No matter the reason, here are five simple steps you can take to get that done.

1. Open the PDF file
2. Click the print icon
3. In the printer selection options click save as PDF
4. Save the file in your preferred location
5. The newly saved file will not be password protected
